In Depth Presentation Description

Vesta, the only visible asteroid from Earth, has a special orbital pattern and archetypal energy that plays a significant role in the overall dynamics of an astrology chart. Erik Roth will discuss its return cycle and its relation to Saturn cycles on the Shamanic Timelines.

The symbol of Vesta is the sacred fire of the hearth, meaning focus in Latin. It is the central fire within us all, to tend to in our lives. It is the emerging, personal sacred hearth or focus within our being and what archetypal energy we learn to maintain to keep ourselves connected to what is sacred in our lives.

Vesta's orbit coincides with Saturn's major timeline flashpoints, which will deepen the understanding of our sense of self. Erik has looked into the elliptical patterns of this asteroid goddess and found that it plays a role during the "7-Year" Saturn timeline initiatory phases. Erik will present the hard facts and numbers along with defining this feminine energy and how it differs from the Venus anima or feminine principle. Also, Vesta is the only asteroid that is (just) visible to the naked eye from Earth this gives it a way to determine its return/synodic cycle.

In addition, Erik will discuss Vesta's resonance with the archetype of Virgo and mythology of how this archetype has been misinterpreted by the ruling patriarchy for thousands of years. With his research, Erik will show how Vesta belongs as a formal initiatory process and archetypal energy in Shamanic Astrology.
